A Descriptive Survey Research Study Descriptive-survey research uses surveys to gather data about varying subjects. This data aims to know the extent to which different conditions can be obtained among these subjects. For example, a researcher wants to determine the qualification of employed professionals in Maryland. Descriptive Research Designs: Types, Examples & Methods Descriptive research is usually defined as a type of quantitative research, though qualitative research can also be used for descriptive purposes. The research design should be carefully developed to ensure that the results are valid and reliable.
