Little is known regarding genetic mechanisms that guided the evolution of seeds in the Middle Devonian, but evolution of flowers has received considerable attention by developmental and evolutionary biologists. Plant Evolution - an overview | ScienceDirect Topics Establishing the timescale of early land plant evolution is essential to testing hypotheses on the coevolution of land plants and Earth's System. Here, we establish a timescale for early land plant evolution that integrates over competing hypotheses on bryophyte–tracheophyte relationships.

We estimate land plants to have emerged in a middle Cambrian–Early Ordovician interval, and ... Evolutionary phenomena are characteristics of populations that are described by averages, medians, distributions, and other statistical methods. This distinguishes plant evolution from plant development, a branch of developmental biology which concerns the changes that individuals go through in their lives. The study of plant evolution attempts to explain how the present diversity of plants arose over geologic time. It Plant evolution - Wikipedia Explores the evolution of plants from simple mosses to flowering trees and the main ways that plants adapted to life on land. % Plant Evolution (Read) | Biology | CK-12 Foundation "In a true tour de force, Niklas assays the mechanisms and patterns of evolution, from molecules to ecosystems, using plants as examples. Must-reading for plant scientists, Plant Evolution will both delight and challenge everyone who peers into the heart of biology." - Andrew Knoll, Harvard University Plant

Evolution: An Introduction to the History of Life ... Evolution of land plants from the Ordovician Period through the Middle Devonian. Botanists now believe that plants evolved from the algae; the development of the plant kingdom may have resulted from evolutionary changes that occurred when photosynthetic multicellular organisms invaded the continents. The earliest fossil evidence for land plants consists of isolated spores, tracheid-like tubes, and sheets of cells found in Ordovician rocks.
