Applied Oracle Security: Developing Secure Database and ... Oracle Secure Coding Standards are a roadmap and guide for developers in their efforts to produce secure code. They discuss general security knowledge areas such as design principles, cryptography and communications security, common vulnerabilities, etc., and provide specific guidance on topics such as data validation, CGI, user management, and more. All Oracle developers must be familiar with these standards, and apply them when designing and building products. Secure Coding Standards | Secure Development | Oracle Oracle policy is to include all security fixes in a Critical Patch Update in subsequent patch sets and product releases. If this is not possible, due to the timing of a release, Oracle creates a patch containing the latest Critical Patch Update fixes that can be applied on top of the newly released patch set or product release.
