maintain appropriate states of arousal, are often entwined within models of executive functioning (Diamond, 2013). Frontiers | Cognitive Restoration in Children Following ... Cognitive Science studies the nature of the human mind and its interactions with the environment and other minds. It challenges our concepts of what it is to be human and what it means to be cognitive. In doing so, Cognitive Science addresses standard cognitive topics, such as sensation, perception, attention, memory, judgement and decision making, problem solving, reasoning, motor cognition, creativity, emotion and language.
