Appropriate clinical management of

malaria in children is critical for

preventing progression to severe

disease and for reducing the

continued high burden of malaria

mortality. This study aimed to

assess the quality of care provided

to children under 5 diagnosed with

malaria across 9 sub-Saharan

African countries. Quality of clinical

management of children diagnosed with ... Staphylococcus aureus is a common cause of community and health care-associated bacteremia, with authors of recent studies estimating the incidence of S aureus bacteremia (SAB) in high-income countries between 8 and 26 per 100 000 children per year. Despite this, <300 children worldwide have ever been randomly assigned into clinical trials to assess the efficacy of treatment of SAB. Clinical Management of Staphylococcus aureus Bacteremia in ... The clinical management of febrile children continues to evolve, especially in the light of vaccines against Haemophilus influenzae type B and more recently, Streptococcus pneumoniae. These vaccines have

decreased the risk of serious bacterial illness in most children, allowing for a more selective approach to investigation and empirical treatment. Clinical management of fever in children younger than ... This third edition of the Malawi Guidelines for Clinical Management of HIV in Children and Adults will be implemented starting May 2016. It replaces all previous editions of the Malawi Antiretroviral therapy (ART) and Prevention of Mother to Child Transmission (PMTCT) guidelines.
