[PDF] In order to perform a filling or
crown, dentists use what they have
learnt from metallurgy (specifically,
dental metallurgy), which is the
science of producing and using
metals. Filling materials are used
for restoring a defective tooth
(cavities, fracture, etc.) to its
original form and the protection of
its sensitive tissues against further
decay. Materials - Chemistry of

The 3rd edition of 'Dental Materials (Principles and Applications)' by Zohaib Khurshid and his co-editor is an up-to-date information manual in the field of dental material science. (PDF)

Dental Materials (Principles and Applications) Metallurgy is a domain of materials science and engineering that studies the

physical and chemical behavior of metallic elements, their inter-metallic compounds, and their mixtures, which are called alloys. Metallurgy encompasses both the science and the technology of metals. That is, the way in which science is applied to the production of metals, and the engineering of metal components used
