and constant specific heats.

Examples are given including one-dimensional isentropic flows, shock waves, and boundary layers. In the framework of these examples, various flow configurations are considered such as expanding flows in nozzles, kinematics of shock waves ... Elements of Gas

Dynamics These results are applied to flows past a wedge and a circular cone. Finally, unsteady compressible flows are analysed, in particular shock tubes and blast waves are considered. Keywords: piston theory, Crocco's formula, theory of characteristics, Prandtl-Meyer flow, shock wave, shock polar, shock tube, blast wave. Elements of Gasdynamics Elements of Gasdynamics. Details.
