2 by Bernd Würsig ... The diets of marine mammals
vary considerably as well; some eat zooplankton,
others eat fish, squid, shellfish, or sea-grass, and a few
eat other mammals. While the number of marine
mammals is small compared to those found on land,
their roles in various ecosystems are large, especially
concerning the maintenance of marine ecosystems,
through processes including the regulation of prey

populations. Marine mammal - Wikipedia Encyclopedia of Marine Mammals book. Read 2 reviews from the world's largest community for readers. This thorough revision of the classic first edition b... Encyclopedia of Marine Mammals by William F. Perrin Marine mammals live in and around the ocean. They are warm-blooded, breathe air, have hair at some point in their lives, give birth to live young (as opposed to laying eggs), and nourish their young by secreting milk. Dolphins, whales, seals, sea lions, walruses, polar bears, manatees, and dugongs (manatee relatives) fall into this category.
