process that uses some features of the speech signal to determine if a particular person is the speaker of a given utterance. Forensic Speaker Identification: A Review of Literature ... When an anonymous speech sample is associated with a criminal matter, for example in the case of a phoned-in bomb threat or ransom demand, forensic linguistic profiling may be used to infer attributes of the speaker from his or her linguistic characteristics. In this review, we present research and case examples outlining what types of speaker characteristics are discoverable via speaker profiling by expert linguists, for example, gender, age, and region of socialization. Unmasking Identity: Speaker Profiling for Forensic ... Forensic speaker
