anteriorly or laterally. Viewed, the affected vertebra resembles a wedge. These fractures are more commonly found in the thoracic spine, which is rather rigid displaying only a few degrees of flexion and extension. Vertebral Wedge Fracture -

SpineUniverse Compression fractures of the spine usually occur at the bottom part of the thoracic spine (T11 and T12) and the first vertebra of the lumbar spine (L1). Compression fractures of the spine generally occur from too much pressure on the vertebral body. This usually results from a combination of bending forward and downward pressure on the spine. Thoracic Compression Fractures | University of Maryland ... Fractures of the thoracic and lumbar spine may

broken bone fragments can press on the spinal cord or lower spinal nerves and produce leg numbness and pain. These symptoms should improve. Very occasionally the nerves are more affected and you may notice lower leg weakness. Spinal fractures - North Bristol NHS Trust Cervical fractures and dislocations are typically classified according to their region/location and injury/fracture pattern. Because of the unique anatomy of the spine in the region close to the head, cervical injuries are categorized as occipital-cervical (occiput-C2) and subaxial cervical spine (C3-C7) injuries. Cervical Spine Fractures & Dislocations - USC Spine Center ... The highest number of complete motor and sensory neurological deficits was
