position is momentary, and it turns on the high voltage
for manual or rear-panel analog control. In the middle
position, the high voltage is enabled (but not

necessarily ON) and can be turned on over the computer interface. The large red ON LED above the switch indicates that the high voltage is on; the yellow TRIP LED indicates a trip has occurred. Operation and Service Manual Before using the CS6102 High Voltage Galvanic Stimulator please read this entire manual carefully to become familiar with the features, benefits and operation.
