Introduction To Meteorological Instrumentation And Meteorological instruments or Weather instruments are the equipment used to find the state of the atmosphere at a given time. Each science has its own unique sets of laboratory equipment. Meteorology, however, is a science which does not use much laboratory equipment but relies more on on-site observation and remote sensing equipment. In science, an observation, or Observable, is an abstract idea that can be measured and for which data can be taken. Rain was one of the first quantities to be mea Meteorological instrumentation - Wikipedia Introduction To Meteorological Instrumentation And
