The study of the raw materials includes the macroscopic assignation of the remains to some of the basic lithic categories (quartzite, quartz, and chert/flint) and has focused specifically on the non-detritic fine-grained siliceous varieties (chert, radiolarite and flint) for two main reasons: they are the most common types in the two sites (especially in El Espertín) and the largest number of previous studies has been performed on those types of rocks. Management of lithic raw materials in the “Mesolithic with ... In archaeology, lithic technology includes a broad array of techniques used to produce usable tools from various types of stone. The earliest stone tools were recovered from modern Ethiopia and were dated to between two-million and three-million years old. The archaeological record of lithic technology is divided into three major time periods: the Paleolithic (Old Stone Age), Mesolithic (Middle Stone Age), and Neolithic (New Stone Age). Lithic technology - Wikipedia The raw material used by the Mesolithic communities on Lough Allen in their stone-working was dominated by chert followed by tuff, other non-specific volcanic types, siltstone/mudstone, flint, and a non-carboniferous chert; an axe of shale and one

Mesolithic Lithic Raw Materials - Internet Archaeology This chapter introduces and describes some rudimentary techniques to help determine lithic raw-material types. However, the variation in lithic raw-material types is enormous and only a fraction of that variation is directly associated with chipped stone tools. Lithic raw materials (Chapter 3) - Lithics The use of local stone sources from the earliest initial occupation of the valley, especially the BSM which appeared to be only available in a limited locality, also shows that within a short period of time, the lithic landscape was quickly understood and used in an optimal fashion, with different raw materials selected for different purposes based on a comprehensive understanding of the raw ... Learning the lithic landscape: using raw material sources ... Although lithic raw material data suggest that Kirk groups were highly mobile (e.g., see this paper) the area of the "horizon" is much too large for it to be the product of a single group of people: the hunter-gatherers discarding Kirk points in Ontario are not the same individuals as those discarding Kirk points in Florida. Category: Lithic Raw Materials - Andy White Anthropology the collections span the target region and include a sample of the range of lithic resources found in the LRGV from the Pleistocene to historic times. In the Shetland islands off the north coast of Scotland there was major exploitation of a lithic source known as riebeckite felsite during the Neolithic period. This source provided the raw material for the majority of stone axes known from the

archipelago and also for objects known as Shetland knives. Traditional Knowledge and Lithic Resources where exposures of lithic material are non-existent, prehistoric people developed strategies that mini-mized the cost of acquisition and the risk of procure-ment failure by importing finished or near-finished tools, scavenging discarded tools, recycling worn or broken tools, and practicing raw-material conserva-tion (Austin 1997).
