Knowledge Management is an  
exciting new field in the  
intersection of mathematics and  
computer science. We need  
efficient, new techniques - based on  
sophisticated formal mathematics  
and software technology - for taking  
fruit of the enormous knowledge  
available in current mathematical  
sources and for organizing  
mathematical knowledge in a new

RISC Mathematical Knowledge  
Management is an innovative field  
in the intersection of mathematics  
and computer science. Its  
development is driven on the one  
hand by the new technological  
possibilities which computer

science, the internet, and intelligent knowledge processing offer, and on the other hand by the need for new techniques for managing the rapidly growing volume of mathematical knowledge. Mathematical Knowledge Management 2007 Overview. The Trends in International Mathematics and Science Study (TIMSS) provides reliable and timely data on the mathematics and science achievement of U.S. students compared to that of students in other countries. TIMSS data have been collected from students at grades 4 and 8 since 1995 every 4 years, generally.
