In this configuration the router will not get IP configuration from the modem. The LTE Passthrough modem can pass both IPv4 and IPv6 addresses if that is supported by modem. LTE - RouterOS - MikroTik Documentation Add upgrade

router (192.168.100.1) information to a router that you want to update (192.168.100.253), required settings IP address/Username/Password Click on refresh to see available packages, download the newest packages and reboot the router to finalize the upgrade. Upgrading and installation - RouterOS - MikroTik Documentation Warning: If password is not provided in RouterOS versions older than v6.43, then the backup file will be encrypted with the current user's password, except if the dont-encrypted property is used or the current user's password is empty. The backup file will be available under /file menu, which can be downloaded using FTP or using Winbox.

... Backup - RouterOS - MikroTik Documentation Let's

assume that there is an IPIP packet coming in the router. Since it is a regular ipv4 packet it will be processed through all routing-related facilities ( until "J" in the diagram). Then the router will look if packet needs to be decapsulated., in this case, it is an IPIP packet so "yes" send packet to decapsulation. Packet Flow in RouterOS - RouterOS - MikroTik

Documentation hEX hEX is a powerful five port Gigabit Ethernet router for locations where wireless connectivity is not required.. First use. Choose your powering solution, please see Powering section for possibilities.; Connect your Internet cable to port 1 (labeled "Internet"), and local network computers to ports 2-5. hEX - User manuals - MikroTik

Documentation For local devices behind the router to be able to access the internet, local networks must be masqueraded. In most cases, it is advised to use src-nat instead of masquerade, however in this case when WAN address is dynamic it is the only option. ...
