POPULATIONS Adapted from Kim Foglia I. Introduction:
(Read this first) The size of populations in a community
are regulated in many ways. Some of the controls
acting on populations are: • the amount of food and
water available to feed the population • the amount of
nesting sites available to support raising
young NATURAL CONTROLS OF POPULATIONS The
population size of each creature that the environment
can support is called the carrying capacity of that
ecosystem. This limit represents how many of a certain
species that can survive in that area. In this lab we will
study two real life examples of populations, their
natural controls, and the carrying capacity of their
communities. NATURAL CONTROLS OF POPULATIONS
