Neuroscience And Legal Responsibility Oxford Science and law have been locked in a dialogue on the nature of human agency ever since the 13th century when a mental element was added to the criteria for legal responsibility. The rich story told by the authors in this volume testifies that far from ending this dialogue, neuroscience, psychology and behavioural genetics have the potential to further enrich and extend this dialogue. some time. Law and Neuroscience | Journal of Neuroscience The intersection between law and neuroscience is fertile ground for a variety of issues that implicate both scientific and philosophical questions. In the context of the criminal law, the most fertile ground for inquiry is the interplay between states of mind and judgments of culpability. Criminal law, neuroscience, and ... - Oxford Academic This chapter draws attention to the analogy between conditions that are treated by criminal law as excusing conditions and certain similar conditions that are treated in another branch of the law as invalidating certain civil transactions such as wills, gifts, contracts, and marriages. This analogy shows that there is a

rationale for our insistence on the importance of excusing conditions in ... LEGAL RESPONSIBILITY AND EXCUSES - Oxford Scholarship This chapter argues that neuroscience is largely irrelevant if the concept of responsibility is properly understood and evaluated. It begins with a positive description of the dominant conception of personhood and responsibility in Western law and morality. It then considers and rejects the challenge to this conception that any materialist scientific understanding of behavior, including ... Moral and legal responsibility and the new neuroscience ...
