Probability distribution - Wikipedia Probability is the branch of mathematics concerning numerical descriptions of how likely an event is to occur, or how likely it is that a proposition is true. The probability of an event is a number between 0 and 1, where, roughly speaking, 0 indicates impossibility of the event and 1 indicates certainty. The higher the probability of an event, the more likely it is that the event will occur. A simple example is the tossing of a fair coin. Since the coin is fair, the two outcomes are both equal Probability - Wikipedia In the 19th century, statistics increasingly used probability theory, whose initial results were found in the 17th and
