Proton Therapy For Prostate Cancer Because standard radiotherapy works just as well as, or better than proton beam therapy, it isn't used to treat prostate cancer in the UK. (i) Radiotherapy is a highly effective treatment for localised prostate cancer, enabling 98% of men with localised prostate cancer who receive conventional radiotherapy survive for at least 10 years. Proton beam therapy | Prostate Cancer UK Proton beam therapy is only suitable for certain types of cancer, such as highly complex brain, head and neck cancers and sarcomas as it does not lead to better outcomes for many cancer cases than using high energy x-rays, which is still
