Protons Neutrons And Electrons Practice This ten question practice test will test your knowledge of the structure of atoms, isotopes and monatomic ions. You should be able to assign the correct number of protons, neutrons and electrons to an atom and determine the element associated with these numbers.

This test makes frequent use of the notation format $Z X Q A$ where: Z = total number of nucleons (sum of number of protons and number of neutrons) X = element symbol Q = charge of ion. The charges are expressed as multiples of the

Protons, neutrons and electrons - Atomic structure - (CCEA ... Atoms are the basic building blocks of ordinary matter. They have the ability to join together and form molecules, which also join together to form the object that we can clearly see around us.

Atoms are composed of particles called protons, electrons and neutrons. Take up the test below and see how much you understand about them. Atoms--> Protons,

Use that information to answer the question that the computer asks about the number of protons, neutrons, electrons or nucleons (particles in the nucleus) that an atom of that element contains. It's Elemental - Element Math Game Atoms are made of protons, neutrons, and electrons. Protons carry a positive electrical charge, while electrons are negatively charged, and neutrons are neutral.
