FSMA Regulation governing the distribution of certain ... Options are part of a larger class of financial instruments known as derivative products or simply derivatives. Swaps. A swap is a derivative in which two counterparties exchange cash flows of one party's financial instrument for those of the other party's financial instrument. The benefits in question depend on the type of financial ... Derivative (finance) - Wikipedia Updated June 24, 2020 A derivative is a financial contract that derives its value from an underlying asset. The buyer agrees to purchase the asset on a specific date at a specific price. Derivatives are often used for commodities, such as oil, gasoline, or gold. 1 Another asset class is currencies, often the U.S. dollar. Financial Derivatives: Definition, Types, Risks In other words, derivatives are financial instruments that are built on top of other instruments like securities, commodities and just about everything else. Derivatives as the name implies are derived from the value of the underlying asset and hence are used to hedge against a rise or fall in the value of the underlying asset.
