Restraint is the process of; holding back, checking, or suppressing an action and/or keeping something under control using safety and some means of physical, chemical, or psychological action. Restraint is a necessary tool used by veterinary staff to allow an animal to be controlled for various procedures. Proper Animal Handling & Restraint The Pet Animals Act 1951 (as amended in 1983) This act protects the welfare of animals sold as pets. It requires any person keeping a pet shop to be

licensed by the local council. Animal welfare legislation: protecting pets - GOV.UK This is detrimental to animal welfare and will increase the difficulty of handling as animals attempt to avoid contact/restraint and may show defensive aggression. Handling stress can also be a major confounding variable and an unwanted source of variation within and between experiments. Good training in non-aversive handling has benefits for ... Handling and restraint | NC3Rs Explains the latest methods of gross and clinical restraint, helping handlers comply with federal and state regulations for humane care of animals.
