River Ecology And Management Lessons From The Pacific ... The environmental management of rivers is required to mitigate the effects of these pressures. This requires a holistic understanding of how river systems are structured and function, and of how these systems have been altered by anthropogenic activities. To this end, the course will examine the interactions between climate, hydrology, geomorphology, ecology, biogeochemical cycling, water and habitat quality and biodiversity. River

Environments and their Management MSc - Postgraduate ... The River Ecology and Management Team conducts basic and applied research on many aspects of aquatic ecosystems. We focus on fluvial systems, from small streams to large rivers, with a particular emphasis on solving real-world conservation problems for aquatic species. Recent large projects have focused on fish migration and fish passage, life history research on migratory species, winter ecology, forest-stream interactions, and fish-mussel host-parasite ecosystems.
