SQL injection is one of the most common web attack mechanisms utilized by attackers to steal sensitive data from organizations. While SQL Injection can affect any data-driven application that uses a SQL database, it is most often used to attack web sites. SQL Injection is a code injection technique that hackers can use to insert malicious SQL statements into input fields for execution by the underlying SQL database. How to Protect Against SQL Injection Attacks | Information ... Yet, few of them emphasise that the best defense against such attacks is a defense in depth, with a

whole range of precautions. Many of these articles focus almost entirely on parameterizing SQL as the defense against SQL Injection. While parameterizing is the first and best defense against SQL Injection, it should not be the only one.
