Surgical Remodeling In Heart Failure Abstract The high mortality and morbidity of patients in terminal heart failure are a therapeutic challenge to modern medicine. Surgically, cardiac transplantation is an excellent treatment for man... Surgical left ventricular remodeling in heart failure ... Cardiac transplantation remains the only definite option; however, due to the shortage of donor organs, very few people benefit. Therefore, surgery of end-stage heart failure using conventional techniques has gained new interest after the introduction of the Batista operation. However, a clear surgical identification of the patients to be

has evolved in a less structured fashion; 4  
INTRODUCTION. Heart transplantation remains the  
ultimate treatment for heart failure; 5 INTRODUCTION.  
Cardiac transplantation is currently the only  
established surgical approach (excluding AVR  
and Surgical Ventricular Remodeling for Congestive  
Heart Failure The Batista procedure (also called a  
reduction left ventriculoplasty) was an experimental  
heart procedure that proposed the reversal of the  
effects of remodeling in cases of end-stage dilated  
cardiomyopathy refractory to conventional medical  
therapy. The hypothesis of the operation appears to be  
that reduction (resection) of marginally viable  
ventricular mass may result in superior geometric

remodeling thus conferring better performance when faced with ventricular failure. Batista procedure - Wikipedia Although a favorable outcome has been reported in selected patients, this method is currently not recommended for treatment of heart failure because of high surgical failure rates. The present paper reviews some of the relevant literature regarding surgical left ventricular remodeling in heart failure. Surgical left ventricular remodeling in heart failure. Surgical options include ventricular resynchronization therapy, surgical ventricular remodeling, ventricular assist device implantation, and heart transplantation. Despite significant understanding of the underlying pathophysiological
