Over 30 years, no theorist of the digital age has better explained the next big thing than Don Tapscott. For example, in Wikinomics Tapscott was the first to show how the Internet provides the first global platform for

mass collaboration. Now, he writes about a profound technological shift that will change how the world does business—and everything else—using blockchain technology, which powers the digital currency Bitcoin. Blockchain Revolution Blockchain technology is front and center of the fintech revolution enveloping financial services. Its flexibility, and potential to solve so many current transactional conundrums, is what makes it so exciting. Information has traditionally been stored by individual organizations using secure servers only they can access. (Law360) Expert Analysis: On The Eve Of A Blockchain ... The distributed ledger is entirely immutable, and every asset on the blockchain can be accounted for. This ensures that multiple

persons can own pieces of real-life assets they would ordinarily be unable to afford as a whole. ADOPTION OF TOKENIZATION AND THE BLOCKCHAIN TECHNOLOGY. The use of tokenization to secure assets became popular in 2017. Tokenization and the blockchain revolution - Crypto Daily™ Blockchain represents nothing less than the second era of the internet - an evolution from a platform for communicating information to a platform for transacting value. Using cryptography, collaboration, and some clever code, blockchain allows us to securely transact anything of value, from money and stocks to data, art, votes, and more. Blockchain Revolution Global Blockchain will simplify the set of concepts revolving around financial

services and the complexity of the IT systems. With blockchain, we will have a cryptocurrency that is more stable and safer than any currency that has ever existed before it. This will bring about true "monetary and financial freedom." - Kun Hu (CEO of Worldmoney) ISO 20022—Central Banks Strike Back ... - blockchain.news Blockchain could revolutionise the way patients think about their clinical data, allowing them to control who uses it and receiving financial rewards for participating in trials. Talking about a blockchain revolution - Pharmaphorum A blockchain, originally block chain, is a growing list of records, called blocks, that are linked using cryptography. Each block contains a cryptographic hash of the previous

block, a timestamp, and transaction data (generally represented as a Merkle tree). By design, a blockchain is resistant to modification of its data. Blockchain -

Wikipedia About the Blockchain Revolution
