The Computer Boys Take Over In The Computer Boys Take Over, historian Nathan Ensmenger traces the rise to power of the computer expert in modern American society. He follows the history of computer programming from its origins as low-status, largely feminized labor in the secret wartime computing projects through its reinvention as a glamorous “black art” practiced by “computer cowboys” in the 1950s through its rationalization in the 1960s as the academic discipline of computer science and the software ... ... The Computer Boys Take Over by Nathan L. Ensmenger ... The notion that computer programmer is not just an occupation but a personality type has a long history. In 1968 the systems consultant Dick Brandon gave a talk at the ACM National Conference on the "Problem in Perspective" (the problem here being the problem of programming labor, one of the more significant "software crises" of the 1950s and 1960s) in which he described the ...
