Integument - Mammals: An important distinguishing character of mammals is their hair. They also possess many other horny derivatives of the epidermis, including nails, claws, hooves, quills, and horns. All mammalian hard keratin, as well as the soft keratin of the stratum corneum, is of the alpha type. Bony dermal plates are found in the armadillo.

Integument - Mammals | Britannica The integumentary system is an organ system that forms the protective covering of an animal and comprises the skin (including glands and their products), haircoat or feathers, scales, nails, hooves and horns. The integumentary system has a variety of functions; in animals, it serves to waterproof, cushion and protect the deeper tissues, excrete waste,
