Neuropathic Pain: Causes, Symptoms, and

Treatment The interaction of these dimensions (sensory-discriminative: intensity, location, quality and behaviour of pain; cognitive-evaluative: thoughts of the pain as influenced by previous experiences and knowledge; and motivational-affective: emotional responses like anger, anxiety and fear that motivate the response to pain)[1] all contribute to the complexity of the painful experience. Psychological Basis of Pain - Physiopedia Neurobiological Basis for Chronic Pain A new paradigm offers a unique perspective and postulates that the fundamental causation of most chronic pain is neurobiological. By John L. Beck, MD In reviewing all types of literature about pain, I sadly note the paucity of research from

my field of Orthopedics. Neurobiological Basis for Chronic Pain They include illusions of colour, shape and motion that are sometimes perceived predominantly to one side of fixation. People who suffer frequent headaches tend to report more illusions, and if the pain consistently occurs on the same side of the head the illusions tend to be lateralized.
