LESER Pressure relief valves are
mainly used in hydraulic systems to
limit the pressure in the system to a
specific preset level and when the
pressure reaches the safety design
limit, the relief valve responds by
releasing the excess flow from an
auxiliary passage from the system
back to the tank in order to prevent
equipment failure. Difference

The Safety Relief Valve Handbook eBook by Marc Hellemans ... The compact spring-loaded safety valve is made of stainless steel (1.4571) for high chemical resistance. It is also available with bellows to balance back pressure and for high tightness to the outside, even at higher back pressures. The safety valve has a variety of connections and is wear resistant with hard-
