Understanding Behaviour In
Dementia That Changes in
perception and hallucinations. For
some people living with dementia,
their brain misinterprets the
information from their senses. This
is called changes in perception and
leads to them misunderstanding the
world around them, or, in more rare
instances, the person having
hallucinations. Read

Behaviors Different kinds of
behaviors occur during the stages
of Alzheimer's. Typically, in the
early stages of dementia, people
will battle the memory loss by
initiating behaviors that they feel
help them to control the situation or
prevent problems. The Complete
Guide to Challenging Behaviors in
Dementia Changes in behaviour can
be one of the most difficult aspects
of living with dementia, both for the
person with the condition and those
around them. These behaviours
usually happen when the person is
feeling confused or distressed and
trying to make sense of what is

happening, or when they are trying

to communicate that they need something. Changes in behaviour - Alzheimer's Society Behaviour is communication. Whether it's good, bad or indifferent, it is a clear expression of our feelings and needs. People with dementia frequently lose the ability to speak as the disease progresses.

However, they continue to communicate in other ways - through body language, gestures and facial expressions. Behaviour in dementia as a form of

communication When supporting a person with dementia, it can be helpful for carers to have an understanding of the impact the condition has on that person. This includes understanding how the person might think and feel, as

behave. The person may be experiencing a world that is very different to that of the people around them. Understanding and supporting a ... - Alzheimer's Society Key messages

■■ Behaviour that challenges (BtC) can be a consequence of a person's unmet health or psychosocial need(s). BtC can be defined as: 'An expression of distress by the person living with dementia (or others in the environment) that arises from unmet health or psychosocial need(s). 'Behaviour that challenges' in dementia Dementia is a progressive condition that can affect a person's behaviour. Some people with a dementia show distressed behaviour. They might become angry, aggressive or

and waking others at night.' Managing challenging

behaviour in dementia |
hometouch Dementia is a result of
physical changes in the brain, and
these can affect the person's
memory, mood and behaviour.
Sometimes, behaviour may be
related to these changes, but at
other times, the behaviour may be
triggered by changes in the
person's environment, health or
medication. Dementia - behaviour
changes - Better Health

Channel Apparent changes in the
personality of the person living with
dementia are a major source of
distress both to the person who is
presenting the behaviours and to
those who experience them.
