Water From A Deep Well Water From a Deep Well: Christian Spirituality From Early Martyrs to Modern Missionaries (2007, IVP) by Gerald Sittser was an excellent book, but perhaps a bit difficult to classify. It is part church history, part Christian spirituality, and part practical living. Water from a Deep Well (PB): Amazon.co.uk: Gerald L ... Deep Wells A deep well system consists of an array of bored wells pumped by submersible pumps. Pumping from each well lowers the groundwater level and creates a cone of depression or drawdown around itself. Several wells acting in combination can lower groundwater level over a wide area beneath an excavation. Deep Wells |

Engineering Withdrawing water from a well causes the water levels around the well to lower. The water level in a well can also be lowered if other wells near it are withdrawing water. When water levels drop below the levels of the pump intakes, then wells will begin to pump air - they will "go dry." Groundwater Wells - USGS A well is an excavation or structure created in the ground by digging, driving, or drilling to access liquid resources, usually water. The oldest and most common kind of well is a water well, to access groundwater in underground aquifers. The well water is drawn up by a pump, or using containers, such as buckets, that are raised mechanically or by hand. Water can also be injected
