psychology involved in identification. Witness identification in criminal cases: psychology and ... Social scientists have demonstrated through studies since the 1960s that there was significant reason to be concerned about the accuracy of the eyewitness-identification testimony used in criminal trials. Although witnesses can often be very confident that their memory is accurate when identifying a suspect, the malleable nature of human memory and visual perception makes eyewitness testimony one of the most unreliable forms of evidence. The Trouble with Eyewitness Identification Testimony in ... In most cases, the prosecution typically proves identity using eye witness testimony. However, eye-witness
