patients/clients require care of their wounds in hospitals and community settings across the Health Service. Wounds have a major personal, social, and economic impact. HSE National Wound Management Guidelines 2018 Over the past 20 years, studies have generated much evidence to show that a moist wound environment is essential for wound healing. This has caused a proliferation of wound dressings with a higher acquisition cost than standard dressings and has left wound care providers confused about when it is appropriate to use these more expensive dressings ( Agency for Healthcare Research and Quality 2014 ).
